

ABSTRACT

5 A catalyst composition for a cell comprising
catalyst-bearing conductive powder particles and fibrous
carbon. A membrane-electrode assembly for a fuel cell
comprising an electrolyte membrane and an electrode
including a catalyst layer and a gas diffusion layer, the
electrode being provided on each surface of the
electrolyte membrane, wherein at least a portion of the
10 surface of the gas diffusion layer which is in contact
with the catalyst layer includes a layer containing a
hydrophobic resin and fibrous carbon.
